Summary

Software engineer.

Work experience

Software Engineer

June 2018 - Present

FreeNOW

Developed reliable, highly available and scalable low latency services for the ride-hailing system. As a part of an allocation team I was responsible for maintaining and improving dispatching logic - reducing waiting time for passengers, optimising distribution of tours for drivers. Participated in architectural decisions, investigated and processed production incidents, established end-to-end test coverage for different dispatching algorithms.

Technologies: Java 11/Kotlin, Spring, Postgres, Git, RabbitMQ, AWS/Kubernetes, Scrum

Backend Developer

July 2017 - Feb 2018

Intera LLC

Developed SaaS platform for online education in Russian schools.

Developed SCADA system for monitoring railway traffic in Saint-Petersburg.

Technologies: Java 8, Spring, Postgres, Git, Angular 4, Typescript, Kanban

Java Developer

Feb 2016 - June 2017

Deutsche Telekom RUS

Developed internal projects (time-tracking and absence management system, in-office navigation platform)

Maintained and improved disaster handling system for replacing failed network communication nodes.

Developed a testing toolkit for mocking web-services of Deutsche Telekom.

Technologies: Java, MySQL, Ruby on Rails, CoffeeScript, Oracle, PL/SQL, Scrum

Education

Bachelor of Computer Science and Applied Math

2013 - 2017

[ITMO University](#)

Winner at hackathons with different apps in recruiting, restaurant and government areas.
